Minutes

Meeting opened 7:08

Agenda item 1: Waushakum Pond Association appearance  
The Association represents both the Framingham and the Ashland people residing around the pond. There are public boat ramps and there is beach access. The association has 250 people on its outreach list and 44 active members. Their goal is to preserve swimming and boating for future generations. They need help to get a grant to fight invasive weeds in the ponds. The pond is seriously impaired with turbidity and phosphorus. There are 12 outfalls. Dredging is not required even though the pond is badly silted. The silt at the main outfall end supports vegetation that help clean the pond. There is a rare sedge in places so Natural Heritage has at times blocked treatment. The algae bloom at present is very obnoxious. A couple rain gardens were installed in the past by are no longer functional.

Evan offered that SWAC and the DPW Stormwater Div. have no jurisdiction at the present time because the EPA has not set MS4 TMDL limits.

The Committee thanked the Association for coming and will discuss what, if anything, it might do to help.

Agenda item 2. IDDE Bylaw status: Maeghan Dos Anjos indicated that the bylaw is still in the State Attorney General’s office waiting for approval. We will need to write some regulations to accompany it once it is approved.

There being little time remaining and upon a motion duly made and seconded, it was voted to adjourn at 8:58 – voted: 3/0/0
