**Cheryl Yancey**, W&S/Utility Billing  
**Donna Musto**, W&S/Utility Billing  
**David Miller**, Personnel/Rubbish/Recycling

## SEWER WORK NOTICE

The Town of Ashland is conducting a sewer study to locate sources of stormwater entering the sanitary sewer system. The Town, in conjunction with their engineering consultant Haley Ward, Inc., has contracted with Flow Assessment Services, LLC to conduct dye test investigations in your area. The testing involves putting a non-toxic, non-staining dye into downspouts, area drains, window well drains, stairwell drains, and driveway drains. The field representatives will then monitor the stormwater pipes and sanitary sewers in the street to confirm proper connections to the stormwater system.

Please Note:

- 1) Testing will be conducted weekdays between 8:00 AM and 5:00 PM.
- 2) Testing at each property is typically completed within 20 minutes.
- 3) You are **NOT** required to be home when the dye testing is being performed unless interior roof access (if available) is necessary. **Please contact Flow Assessment Services at 1-888-311-9799 between 8am-5pm M-F, ONLY if you have a flat roof over 12-foot high (1-story) to discuss and coordinate roof access.**
- 4) Prior to testing the testing personnel will knock on your door to ascertain if you are home and to alert you of their presence. All Flow Assessment Services personnel carry photo ID badges.
- 5) Testing is scheduled to be completed by Flow Assessment Services' field crews between Monday, September 19, 2022 and Friday, September 30, 2022.

If you have any questions regarding this work planned by the Town please contact the Town's consultant Robert Pickering, Haley Ward, Inc. at (978) 648-6025 or email [rpickering@haleyward.com](mailto:rpickering@haleyward.com), or Dan Maurer, Ashland Water & Sewer General Foreman at (508) 532-7954 or email [dmaurer@ashlandmass.com](mailto:dmaurer@ashlandmass.com).

Your cooperation is greatly appreciated in this effort to provide quality sanitary sewer service.
