Good morning Peter, As discussed GCG has old files from when the Walgreens was permitted around 2002 and we used those files as a reference when reviewing the current applications to understand the original intent of the drainage system design and made reference to that document in our peer review letter. We are suggesting the applicant conforms to the requirements of maintaining and operating the stormwater system which was a requirement of the original site plan approval in the time frame around 2002. Any questions, please feel free to call.

Mike
