

Temporary Closure of Bay Circuit Trail

Work on the Sudbury Riverwalk Trail has started, with the installation of erosion controls already happening this week and the clearing of selected trees occurring next week. Over the next two months, work will be done creating the stone dust path and the installation of abutments for the long-span bridge.

Over the next few months, the Riverwalk is closed and there is no access to the trail. We appreciate your patience as we construct this unique community-wide resource.
