

Questions & Answers about your new 90-day supply network

1. Where can I get a 90-day supply of medication?

You have two convenient ways to get up to a 90-day supply of your maintenance medications (those drugs you take regularly for ongoing conditions):

- Through mail order from the Express Scripts PharmacySM, or
- At any CVSTM pharmacy

2. How can I find a participating CVSTM pharmacy?

There are more than 9,000 CVSTM pharmacies nationwide. You can locate one by registering or logging in at [express-scripts.com](https://www.express-scripts.com) and choosing **Find a Pharmacy** from the menu under **Prescriptions**. Smart90[®] CVSTM pharmacies will be noted in your search results.

3. What action do I need to take?

If you haven't already chosen where you want to get your maintenance medications, you will need to do so. You can choose to use the Express Scripts Pharmacy or a CVSTM pharmacy, or you can continue with your current non-CVS pharmacy. **Please visit [express-scripts.com/decide](https://www.express-scripts.com/decide) to let us know your choice of pharmacy.**

4. What do I need to know about paying for my maintenance medication once I choose a pharmacy?

- **If you choose the Express Scripts Pharmacy or a CVSTM pharmacy**, you will pay one mail order copayment for a **90-day supply** of medication.
- **If you use a non-CVS pharmacy**, you will pay one retail copayment for a **30-day supply** of medication. (Your prescription drug plan does not cover 90-day supplies at non-CVS retail pharmacies.)

5. Why does Express Scripts recommend choosing a pharmacy to fill my prescriptions?

If you do not choose and you keep ordering a 30-day supply instead of a 90-day supply, or you continue using a non-CVS pharmacy after your second fill, you will pay full cost for the medication. **To avoid this higher cost, visit [express-scripts.com/decide](https://www.express-scripts.com/decide) to let us know your choice.**

6. What is the advantage of getting up to a 90-day supply vs. a 30-day supply?

By getting up to a 90-day supply, you will make fewer trips to the pharmacy, and you will only need to make one payment every three months. You will pay the same copayment for your 90-day supply—whether you fill through mail order from the Express Scripts Pharmacy or from a CVSTM pharmacy. Also, there is a savings for getting one 90-day supply vs. three 30-day supplies at a retail pharmacy.

7. How do I receive a 90-day supply?

You can have the Express Scripts Pharmacy deliver it (with free standard shipping) by visiting [express-scripts.com](https://www.express-scripts.com) and clicking the top banner for **Pharmacy Options**. Or, you can fill and pick up your prescription at a CVSTM pharmacy.

8. What is the difference between maintenance medications and short-term drugs?

Maintenance medications are those you take on an ongoing basis, such as to treat high blood pressure or high cholesterol. Common maintenance medications include:

- amlodipine (generic Norvasc®)
- atorvastatin (generic Lipitor®)
- Invokana®
- Januvia®
- levothyroxine (generic Synthroid®, Levothroid®, Levoxyl®)
- lisinopril (generic Zestril®)
- Lyrica®
- metformin (generic Glucophage®)
- sertraline (generic Zoloft®)
- simvastatin (generic Zocor®)
- Xarelto®

Short-term drugs include antibiotics and other medications that you take for short periods of time. Under your plan, you can fill short-term prescriptions at any participating retail pharmacy in your network.
